MAXIMIZING YOUR MORSE EQUIPMENT

Learn About The Best From The Best

The respected leaders in security management products, Morse Watchmans, Inc. proudly offers you in-house product training classes, conducted by our equipment experts at our world headquarters in Oxford, CT. Our informative, interactive training sessions allow you to learn from those who know our products the best. Our state-of-the-art seminar room provides a quiet, interruption-free environment, so you can focus on the finer points of your security equipment. The classes follow a logical path, where you will be walked through every feature and benefit of your Morse Watchmans products.

KEYWATCHER/KEYBANK KEY CONTROL SYSTEMS

Training Class

Overview

Morse Watchmans' key control systems include the scalable and secure models within the KeyWatcher and KeyBank products. Our training session will walk you through everything you need to know about maintaining key security from set up to software. Our skilled seminar conductors are very thorough and happy to answer all your questions. You will leave the seminar with a much greater understanding and appreciation for the vast security capabilities of your key control system.

Highlights

- Setup and Installation
- Hardware and Parts Identification
- Programming and Customization
- Accessories
- System Maintenance
- Software Navigation and Functions

Approach

The key control systems training course can be tailored to fit your unique needs. Before the seminar takes place, we will ask you about how you plan to use the system, so that your training experience will be customized for optimal results. This is a hands-on, individualized teaching program.

POWERCHECK GUARD TOUR SYSTEMS

Training Class

Overview

Morse Watchmans' guard tour systems feature the PowerCheck line of products for reliable asset protection. By the end of our training session, you will discover all you need to know about the proper use of the handheld device, checkpoints and reporting software for your guard tours. Covering everything from installation to advanced functionality, our expert seminar conductors will take you through the entire process. Upon completion of the course, you will learn how to reach the true potential of your guard tour system.

Highlights

- Setup and Installation
- Programming and Customization
- Performing Tours
- Accessories
- System Maintenance
- Software Navigation and Functions

Approach

The guard tour training course follows a structured agenda to cover all important information, yet allows for informal questions and answers. You will be submersed in the system, learning how to appropriately conduct a guard tour. We'll also cover the essential details of the software and hardware to best meet your unique security needs.
